

Education

Ph.D. Physics, University of Paris Est, France & University of Tunis El-Manar, Tunisia, 2016

M.Sc., Condensed Matter Physics, University of Tunis El-Manar, Tunisia, 2012

Bachelor, Sc., University of Tunis El-Manar, Tunisia, 2010

Professional Experience

Research Associate

University of Pennsylvania, July-2023-Present

- Investigating the water and sulfur dioxide depletion in Venus' Atmosphere using computational tools.

Postdoctoral Research Associate

University of Pennsylvania, 2018-2023

- Conducted a comprehensive analysis of the pivotal role of photochemistry in the proposed solar geoengineering strategy, focused on mitigating Earth's temperature. Successfully introduced an alternative photochemical pathway to clarify the processes involving molecule destruction and the generation of new molecules.
- Successfully investigated the thermodynamics and spectroscopic properties of 11 novel aluminum compounds that were previously inaccessible to experimental studies. My groundbreaking research led to the experimental observation of two of these compounds, validating the accuracy of the predicted data.
- Accomplished comprehensive exploration of the electronic structure and thermodynamics within a diverse set of 32 molecules encompassing both organic and inorganic compounds of small and medium size. These molecules are of paramount significance to biological, atmospheric and astrophysical contexts.
- Published research findings in scientific journals and presented at national and international conferences.
- Mentored and trained graduate and undergraduate students, providing guidance in computational techniques.

Postdoctoral Fellow

University of Nebraska Lincoln, 2016-2018

- Explored the photochemistry and excited states of molecules with astronomical and astrophysical significance.
- Collaborated closely with experimental team to confirm the detection of novel gas-phase species.

Mentor & Tutor

Astronomical Society of Tunisia, 2014-present

- Provided guidance to schoolteachers and animators on effectively communicating intricate astronomical phenomena and events to the broader public. My focus was on helping them develop the skills and techniques necessary to present complex scientific concepts in a clear manner, allowing young audiences to grasp and appreciate the wonders of the cosmos more easily.

Graduate Research Assistant

University of Paris Est Marne La-Vallee, 2013-2016

- Pioneered a groundbreaking photochemical mechanism aimed at explaining the photoproduction of nitric oxide from thionitrites, which act as crucial vasodilation reservoirs in biological environments. This achievement involved a comprehensive investigation of the structural and spectroscopic properties of diverse intermediate species, including both neutral and negatively charged entities.
- Developed an innovative computational strategy that combines mono and multireference approaches, enabling a thorough exploration of the photochemical pathways of small negative anions. This breakthrough in computational methodology allows for a comprehensive understanding of the intricate photochemical processes governing these species.

Lecturer

University of Tunis El-Manar, 2012- 2013

- Department of Physics, University of Tunis El-Manar

Research Visits

- Mars-April 2016, Institut des Sciences moléculaire, Bordeaux, France *Host: Thierry Stoecklein*

Scientific Work

- Collaborated with experimental and theoretical groups for the research projects.
- Referee for the International conference and exhibition for science (ICES2023).
- Referee for Astrophysical Journal Supplement Series.
- Referee for the Journal Frontiers in Chemistry.
- Referee for the Journal of Physical Chemistry A.
- Referee for the Journal of the American Chemical Society.
- Referee for the Journal Molecules.

Student Supervision

- Supervisor of undergraduate student Juliette Lipson (University of Pennsylvania, January 2023-June2023)
- Supervisor of undergraduate student Jacqueline Friskey (University of Pennsylvania June 2020-2022)
- Co-supervision of PhD thesis of Vincent. J. Esposito (University of Pennsylvania 2019-2022)
- Co-supervision of PhD thesis of Tongheng Chen (University of Pennsylvania 2019-2020)
- Supervisor of undergraduate student Natasa Rohacs (University of Pennsylvania, March to December 2019)
- Co-supervision of PhD thesis by Bilel Mehnen (University of Tunis El-Manar 2016-2018)

Courses Taught

Mathematics for Physics (Tunisia-2012-2013)

Introductory Physics (Tunisia 2012-2013)

Technical Expertise

Programming Language: Fortran, Bash, Latex, Python (Pandas, Matplotlib, NumPy, jupyter notebook).

Computational Expertise: Mono-reference and multireference quantum chemical calculations (DFT and ab initio), Photochemistry, Potential Energy Surfaces, ab-initio Non-Adiabatic Molecular Dynamic (AINAMD), Born-Oppenheimer Molecular Dynamic simulations (BOMD), High Performance Computing (HPC).

Computational Software: MOLPRO, Gaussian09/16, Quantum Espresso, VASP, Psi4, ORCA, MOLSCAT, MOLCAS, GAMESS, CP2K, SHARC, Data Visualization (Gnuplot, Icore-Pro, Molden, Gauss View, Gabedit)

Conference, Seminars and Talks

- Climate Change Solutions and Computational Chemistry, Riyadh, Saudi Arabia, 21th January, 2024 (**Invited Speaker**)
- Density Functional Theory, Winter School, Tunis, Tunisia, 19th-21th December, 2022 (**Invited Speaker**)
- Spectroscopic characterization of the [H, P, S, O] molecular system and chemical insights into the non-detection of phosphorus and sulfur diatomic molecules PS and PH (ISMS June 2022) Illinois USA ([contributed talk](#))
- Photochemical reactivity of atmospheric sulfur compounds of interest in solar geoengineering (2nd Workshop for Young Researchers in Chemistry May 2022) Spain ([contributed talk](#))
- Deep Insight into the Photodissociation of OSSO: (APS meeting March 2021) USA ([Invited speaker](#))
- Photochemistry of HOSO and HOSO⁺: Implication for Climate Geoengineering (ACS Virtual meeting August 2020) USA ([Talk](#))
- Astrochemistry winter school 2020 Biosphere 2 Arizona USA ([Workshop](#))
- Spectroscopy of Jupiter's Atmosphere: Insights from DFT and ab-initio calculations. International Symposium on Molecular Spectroscopy June 2019 USA ([Talk](#))
- Accurate Structure and Spectroscopy of small molecular systems of astrophysical interest, ACS meeting New-Orleans March 2018 USA ([Talk](#))
- On the role of HNS and HSN as light-sensitive NO-donors for delivery in biological media. Quantum dynamics in molecular systems: theory, modelling, simulation 9th-13th November 2015 France ([Poster](#))
- Characterization and reactivity of the weakly bound complexes [H, N, S]⁻. MOLIM 1st General Meeting 27th-29th August 2015) France (**Poster**)
- Études théoriques des états excités des systèmes HNS^q/HSN^q (q=-1, 0, +1)". Ecole de corrosion: EC2EAQ Fes 17th - 19th Décembre -2014. Morocco (**Poster**)
- Séminaire sur la Dynamique Moléculaire Sousse 26th -27th October 2013 (**Talk**) **Tunisia**
- Ten years of NET 45 Faculte des Sciences de Tunis 07th -11th December 2012 **Tunisia**
